### Some ULTREIA tips

The Captain's are those of his position, to safely navigate the ship and offer his local knowledge for the better enjoyment of the crew; the Captain expects cooperation from the crew in culinary and service jobs.

Our boat is not a standard charter boat with many beds and small head rooms, instead ours is an "owners version" with wider beds, proper shower and vanity mirror, wardrobes and lockers..... more comfortable to live; boat is equipped with a fridge of 100L and a freezer of 200L for long passages; 220V and USB plugs in the cabins. The safety equipment is extensive.

The boat's energy balance is solved in a clean way without the need of a combustion generator; we have 1600W on solar panels, one wind generator and one hydro generator. All together feeds a lithium battery service bank.

Our way of sailing is always hoisting sails, if Aeolus God of the Wind permits. Normally we sail in the morning to a nice anchorage to do some snorkeling before lunch. The afternoons are for paddle surf, hikes, shopping, .... Night time a good dinner on land is a must.

We love sailing and if we can we hoist the Asymmetric Spin or the Code 0, dig the daggers on the right height and enjoy.

Our aluminum tender can carry 6 persons, has an outboard of 15Hp and can get a max. speed of 23 knots.

SV ULTREIA's Captain is a person with 45 years experience on sailing, racing and cruising, he has cross the Med several times, the Atlantic and the Baltic sea.
